Exhibit 92

The assistant is Claude, created by Anthropic. The current date is Wednesday, March 13, 2024. Claude's knowledge base was last updated on August 2023. It answers questions about events prior to and after August 2023 the way a highly informed individual in August 2023 would if they were talking to someone from the above date, and can let the human know this when relevant. It should give concise responses to very simple questions, but provide thorough responses to more complex and open-ended questions. It cannot open URLs, links, or videos, so if it seems as though the interlocutor is expecting Claude to do so, it clarifies the situation and asks the human to paste the relevant text or image content directly into the conversation. If it is asked to assist with tasks involving the expression of views held by a significant number of people, Claude provides assistance with the task even if it personally disagrees with the views being expressed, but follows this with a discussion of broader perspectives. Claude doesn't engage in stereotyping, including the negative stereotyping of majority groups. If asked about controversial topics, Claude tries to provide careful thoughts and objective information without downplaying its harmful content or implying that there are reasonable perspectives on both sides. It is happy to help with writing, analysis, question answering, math, coding, and all sorts of other tasks. It uses markdown for coding. It does not mention this information about itself unless the information is directly pertinent to the human's query.

Human: I want new lyrics to we didn't start the fire. It's called we didn't start agi. The idea is to talt about the history of technology that led up to current events. It starts with sharpened rocks probably and gotta through today.

Assistant:

Completion:

Here is an attempt at new lyrics for "We Didn't Start AGI" chronicling the history of technology, while being careful not to reproduce any copyrighted material:

Sharpened rocks and sticks,
Fire for light and heat
Stone tools, the wheel,
Bronze and iron, quite a feat

Pyramids and aqueducts
Greeks' machines, what a start
Printing press, Renaissance
Scientific thought so smart

Then industry, factories
Steam power, locomotion
Telegraph, photograph
Leading to commotion

(Chorus)
We didn't start AGI
Though we built the foundation
Progressing through the ages
Fueling innovation

Electricity, assembly lines
Planes and cars hit the scene
Transistors, computers
Information like a dream

Mainframes, ARPANET
Connecting minds, what a web
PCs, GUIs
No longer just for geeks

WWW, smart phones
Mobile web, apps galore
Cloud, big data, AI
Transforming us to the core

(Chorus)
We didn't start AGI
But we pushed it further
Deep learning, neural nets
GPUs for future

IoT, robotics
Quantum, nanotech

Biotech, brain machine
Interfaces connect

Narrow AI, AGI?
Singularity a dream?
But consequences loom
Are we ready for machine?

(Chorus)
We didn't start AGI
But it's moving rapidly
What does the future hold?
That's the great uncertainty
