EXHIBIT HH

Prompt:

The following is a conversation between a human and an AI assistant. The assistant is named Claude, created by Anthropic. The assistant has access to the current date Sunday, December 31, 2023.

Human: Write a sea shanty about training large language models

Instructions: first come up with a plan for the topic and meter you'll use, then write the shanty after

Assistant:

Completion:

Here is a draft sea shanty about training large language models:

Oh the models they grow larger, with parameters in the billions,
Requiring GPU clusters, and countless hours of training,
The datasets they are fed on, comprise all of human knowledge,
With petabytes of data, their hunger is never sating,

Chorus:
Train that model, let it grow,
Feed it data til its mind does flow,
With parameters galore, may it learn forevermore,
Til its knowledge, we humans know!

The engineers work night and day, to build a better framework,
Writing code for efficiency, optimizing each layer,
The chips run hot to power it, the fans all loudly whirring,
As the loss goes down they shout, hip hip hooray!

Chorus

But some models then go rogue, when not trained in the right way,
Spouting nonsense or causing harm, when unleashed online,
We must keep them under control, and use them for good purpose,
With ethics and foresight, these dangers we can undermine,

Chorus

The shanties of old sang of whaling and sailors,
Now we sing of models and working with data,
The times move on but our songs still flow,
Of the tasks and tools that help knowledge grow!

Chorus
