What is Random Song Generator?

Random Song Generator is a website designed to help music enthusiasts discover new songs and artists effortlessly. By generating 1 to 10 random tracks from the vast library of Spotify music videos, the platform provides a unique and exciting way to explore fresh tunes. Whether you're in the mood for a surprise or looking to expand your musical horizons, Random Song Generator offers a simple and engaging solution to find and enjoy new music.

How many random songs can I generate?

You can regenerate a total of 10 songs per each generation. However you are free to generate as many times as you want. To generate the songs simply enter the number of songs you wish to generate into the search bar above and click the reload button. The number of songs must be between 1 and 10 inclusive. If an incorrect number is entered the number will default to 6 results. You can also leave the input blank which default to 6 results.
